

CNC Setup / Operator

Job Description

Dunham Products Inc is currently looking to fill our new CNC setup/operator position. We have been in business since 1946 and are a manufacturer of fasteners. Servicing a wide range of industries and producing a variety of items. We are a family owned and run company, and strive to ensure that this is the atmosphere in which we continue to grow and work. The ideal person for this positon will be independent, but can work well with others. Ensure tasks will be done in a timely manner and in an organized manner. This is a full time position, Monday through Friday from 7:00 AM to 3:30PM.

Job Function:

Set-up and operate CNC machines to produce high quality finished pieces to exacting tolerances and interrelated dimensions.

Essential Functions:

- Select and install the appropriate tooling and stops.
- Follow procedures for starting, stopping, inspecting the quality of the materials and work in process.
- Inspect and measure work pieces to ensure that the dimensions meet specifications.
- Detect faulty operation or defective materials; correct or report to supervisor.
- Remove finished work pieces from machines and place them in boxes or on racks; set aside pieces that are defective.
- Complete work in a timely manner, according to departmental schedules.

Additional Responsibilities:

- Maintain a clean work environment, including surrounding areas and equipment.
- Perform basic maintenance, such as cleaning and lubricating machine parts. Make sure all moving parts are oiled on machine.
- Thoroughly and accurately, maintain job and production records.
- Watch delivery schedules.
- Work to improve quality and production while limiting the waste of product.
- Observe all safety and health regulations.
- Perform other company related duties as required.

Qualifications

- Minimum of 2 years' experience as a CNC machine set-up operator in a close tolerance manufacturing environment.
- Able to accurately read and interpret blueprints and job routings.
- Able to solve tooling and set-up problems with minimal technical supervision.
- Proficient in the use of all precision measuring equipment including mechanical, optical, and computer assisted measuring equipment.
- Self-starter with strong analytical and problem solving skills.
- Ability to perform close visual work.
- Dependable and efficient.
- Ability to take direction from others.

Job Type: Full-time

Required experience:

• CNC Set-up: 2 years
