DUNHAM PRODUCTS STANDING STRONG

Since 1946 Dunham Products, Inc. has been a company that stands for quality and customer service above all else. Throughout the years Dunham has grown in the aerospace fastener industry and has branched out to include many other fastener applications.

Over the past few years Dunham has undergone many structural changes. In January of 2009 they relocated to their current facility on Northfield Road in Walton Hills. With this move they have been able to add machines and personnel to keep up with their customers' growing demands. With the accessibility of this location to Cleveland and the space to branch out, Dunham now offers complete manufacturing and secondary processes with quick turnarounds.

Dunham's employee structure has also undergone a change. Joseph F. Klukan II has taken his father's seat as President and Owner. He continues to drive the company forward to expand to new markets and offer new services while focusing on growth for his current customers' needs. With his latest family addition of two twin boys in January, 2012 Joe holds firm to his family value of enhancing his business for generations to come.

Former GM, Jay Maslanka has been promoted to Vice President. His hands-on approach to conducting operations carries on in a larger capacity. He has been with the company for nearly a decade and in the industry since his start at Lake Erie Screw, Cleveland.

Office Manager, Sarah Johnson continues to specialize in customer care and logistics. With new personnel to supervise and additional production capabilities, she looks forward to continuing to learn new processes and enhance the fluidity of office operations at

Dunham.

The new, friendly face at the front desk is Kelly Meadows, Office Assistant. She is a welcome addition to the Dunham family providing much needed assistance to Joe, Jay, and Sarah. Also, Kevin Skrebunas is the new Technical Sales contact. He is looking forward to contributing to the growth of the company and industry.

Since 2009, the number of machinists employed by Dunham has tripled, much of which occurred in the last year. Dunham has recently added 4 new thread roller machines and 2 Hwacheon CNC's to its production lines. This opens up their capabilities to meet their

customers' ever growing demands.

In the thread roll department, Dunham now has a larger capacity for various sizes of threading. The new sems machine and high-speed slant machine allow them to competitively accommodate high-speed, automated runs. As always, Dunham has the ability to re-roll, blank roll, knurl and roll threads for most material grades and hardnesses.

With the automatic bar feeders and live tooling on the new CNC's, Dunham has the ability to make more complete and more complex parts with faster prototyping. All of these new capabilities mean lower cost and faster production.

Dunham has redesigned their website, which provides a full list of capabilities and contact information as well as employment opportunities. If you haven't visited in a while, you should check it out at: www.dunhamproducts.com.

With machining dwindling as an American commodity, Dunham Products, Inc. is a strong, family built, Cleveland, Ohio company that is standing tall and holding firm now and into the future.
